

ENVIRONMENTAL POLICY

In accordance with our vision to be recognised as a leading company in providing quality care and value to owners and managers of semi mature and mature trees, shrubs and instant hedging, Instant Landscapes Ltd is committed to minimising and controlling the impact of its business on the environment by means of an environmental management system which will:

- Meet the requirements of all relevant legislation and regulation related to pesticide use and application and where no legislation exists, set our own minimum standards.
- Ensure efficient use of essential chemicals and provide adequate training to all associates in the use and storage of chemicals.
- Constantly maintain environmentally sound working standards and practices. Setting target standards for environmental performance that drive continuous improvement.
- Our vehicles are all Euro 5 engines meeting the European emission standards.
- Make efficient use of energy and natural resources by minimising waste generation and reducing, reusing and recycling wherever possible.
- Our Trees and shrubs are grown in airpots which are made from recycled HDPE.
- Minimise utilities consumption where possible to reduce electricity and actions to efficiently use water, we aim to install a rain water harvester for use on the land.
- Ensure that contractors environmental standards are consistent with our own and work with our suppliers to minimise the impact of their products on the environment.
- Involve all clients by making them aware of our commitment to this policy.
- Communicate with and involve all employees in establishing sound working practices. Providing them with training to enable them to carry out their jobs in a way that cares for the environment

A handwritten signature in black ink, appearing to read "Nick Angel", is written over a light green rectangular background.
